Mini-Assignment #1

Take one of the exercises that you were supposed to do after the first Intro to Visual Studio lab class. Make sure that it works. Follow the instructions in the SET Submission Standards and the lecture on Submitting Assignments (early Week 2) to submit your program. After you create your ZIP file to prepare for submission, rename the ZIP file to mini1.zip. Then, submit mini1.zip to the *Mini-Assignment 1* Assignment Submission Folder.

Once you have submitted your mini-assignment file, make sure that you've received the eConestoga e-mail confirming your submission. Do not submit that e-mail (simply keep it for your own records until you get your mark).
